

CLAYTON BURGESS

CONTACT

(816) 832-1353 • Clayton.burgess19@outlook.com • [linkedin.com/in/claytonburgess](https://www.linkedin.com/in/claytonburgess) • Kearney, MO

KEY SKILLS

Programming & Development: C#, .NET, React, Python, C, SQL Server Management Studio, VS Code, Xunit, git

IT Systems & Tools: Office 365, Active Directory, Windows 11 migration, ticketing systems

Professional Skills: Communication, Documentation, Customer Service, Strategic thinking

EDUCATION

Studies in Associates of Science in Computer Science • August 2019 – December 2021 • Metropolitan Community College Maple Woods • Kansas City, MO

Bachelor of Science in Computer Science • Expected May 2026 • Kansas State University • Manhattan, KS

EXPERIENCE

FULL-TIME INTERN • MIDWEST HEALTH, INC. • TOPEKA, KS • MAY 2025 – AUGUST 2025

- Spearheaded Windows 11 migration across multiple facilities; upgraded and replaced 150+ endpoints (laptops, desktops)
- Resolved 90% of frontline hardware/software/network issues at first contact using Active Directory and Zendesk
- Enhanced infrastructure visibility by creating Wi-Fi signal strength maps, documented data rooms, and mapped security camera systems
- Managed user access and permissions via Active Directory, and EHR system, ensuring strong enterprise identity management

RELEVANT COURSEWORK

Data and Program Structure • Programming Fundamentals • Database System Concepts • Object-Oriented Design, implementation, testing • Software Architecture and Design • Operating Systems • Introduction Algorithm Analysis

PROJECTS

COMPAREPRO • REACT.JS, PYTHON, SSMS, FLASK API • SPRING 2026

- Web application that lets users compare computer components between different sites, using a React frontend, and python back end with a flask API
- Tested edge cases and integration between the backend using pyTests
- Made to eliminate having multiple windows open in a browser at a single time as well as lets users add comments to products in order to research and eliminate the use of excel.
- Used git to add changes or revert to previous versions to ensure code getting worked on was working code before starting next part of implementation

REMODELING MANAGEMENT DATABASE APP • C#, .NET, WINDOW FORMS, SQL, SSMS • FALL 2025

- Developed a user interface using windows forms in .NET with a data grid visualization for managing company data
- Debugged and fixed integration issues between UI, database connectivity, and sql stored procedures
- Implemented data binding and event handling for interactive controls

AWARDS

Dean's List • Metropolitan Community College Maple Woods (Spring 2021, Fall 2022)

Post-acceptance G.E Johnson Engineering Scholarship • Kansas State (Spring 2022)
